

Our Rotherham branch has moved to Sheffield

Our Rotherham branch very recently moved to a spacious new location in Sheffield. The new site reflects our commitment to realize a progressive, competent and appealing company for our clients and employees. After extensive interior and exterior renovation, the new property provides:

Additional space to support our growth

A much needed increased workshop floor (by over 50%)

Excellent working conditions for our staff

Warehouse space for new product lines, with a proper goods in/out area, and the opportunity to store 'clean' products such as webbing slings

An inviting business environment, attractive to visiting clients, where we can show them what we do

Facilities in line with the other facilities within Hendrik Veder Group

A training room for both external and internal training (e.g. Crosby rigging seminar or LEAA training)

Two meeting rooms to meet clients, make professional presentations or collaborate with a team.
